

CO2 Footprint 2022 - 1

Scope 1	Unit	Amount	CO ₂ -emissions (ton)	%
Gas consumption	NM ³	3.271	6.8	1.58
Company cars – Diesel	Liters	64.490	210.36	48.76
Company cars – Petrol	Liters	20.935	58.28	13.50
Powerbox/UFO's – Diesel	Liters	33.297	108.61	25.18

Scope 2	Unit	Amount	CO ₂ -emissions (ton)	%
Electricity (Grey NL)	kWh	65.421	34.22	7.93
Electricity (Grey DE/FR)	kWh	13.565	7.09	1.64
Electricity (Charging on the go)	kWh	1443	0.75	0.17
Business Travel (Airmiles, Train etc)	Km	36.989	5.314	1.23

Dear colleagues,

This year we have achieved our CO₂ performance ladder certificate! For this we have mapped our CO₂ footprint and set reduction objectives which mainly focus on making our vehicle fleet, accommodation and the electricity connections at project locations more sustainable.

In order to keep reaching our objectives we are mapping our CO₂ footprint every 6 months, by doing this we are able to adjust objectives to make them more ambitious or more achievable. We have finished this process for the first 6 months of the year, below you will find the CO₂ footprint for our first 6 months.

The CO₂ footprint shows, once again, that the use of petrol and diesel are the biggest polluters within the company. We are currently looking into more sustainable ways of transportation to reduce these numbers.

In the meantime, please remember to drive more fuel efficient! Below are 6 examples of how you can drive more fuel efficient.

DO YOU NEED TO USE THE CAR?

USE THE BRAKE AS LITTLE AS POSSIBLE

SHIFT UP AS SOON AS POSSIBLE

KEEP THE SPEED CONSISTENT AND
DON'T DRIVE TOO FAST

TURN OFF THE ENGINE

LIMIT THE USE OF AIR CONDITIONING

Do you have any questions or ideas about reducing our CO₂ footprint? Please let us know via qhse@247kooi.com!
